

We are requesting support for **3 months old Master Akshay** who is battling for life against a severe heart disease **Atrioventricular Canal Defect and Down Syndrome** which is most commonly known as hole in the heart. **Atrioventricular Canal Defect** is a combination of heart problems resulting in a large hole in the center of the heart. The condition occurs when there's a hole between the heart's chambers and it starts problems with the valves that regulate blood flow in the heart. Symptoms of this defect sometimes can remain unknown as it commonly happens to infants(new borns).

Master Akshay is just 3 months old and is the only child of his parents. He is currently being treated at AIIMS ,New Delhi. He stopped taking feed and have severe breathing problem due to which he has to undergo an **urgent open heart surgery** for which the **estimated cost is 70000**. His father is a daily wagger and he belongs to Prayagraj,U.P therefore his father cannot afford the cost of surgery. On the request of the poor infants family we are raising funds and extending the support to save life of Master Akshay.

Kindly come forward and support as much as possible to save his life by your generous contribution.

Your extra is someone's need and what you give today will breathe life in the future !!!

We have attached his medical file which consists of his medical diagnosis reports ,different test reports, echocardiography reports and estimated letter of the surgery.
